

CUSTOMER SHOPPING BEHAVIOR

EVIDENCE-LED GROWTH OPPORTUNITIES

Made with **GAMMA**

THE SIGNAL

A loyal customer base is not yet a subscribed one

CUSTOMER BASE

3,900 customer records across 18 attributes

LOYALTY $\neq$ SUBSCRIPTION

80% of customers are Loyal, but only **27%** subscribe

GROWTH QUESTION

Convert repeat behavior into recurring value

DATA QUALITY

The dataset is clean enough to trust the signal

\$59.76

AVERAGE PURCHASE

3.75

AVERAGE REVIEW RATING

0.9%

MISSING RATINGS

Only 37 review ratings were missing, or about 0.9% of records

Missing ratings were filled with category medians; duplicate promo-code data was removed

REVENUE MIX

Clothing and accessories carry the business

76%

of revenue comes from Clothing and Accessories together.

PRIORITIZE INVENTORY, MERCHANDISING,
AND CAMPAIGN DEPTH WHERE DEMAND IS
ALREADY CONCENTRATED

Discounts are widespread, but not always low-value

43%

OF PURCHASES USED A DISCOUNT

1,677 of 3,900 records

839

DISCOUNTED PURCHASES

Still met or exceeded the \$59.76 average

≈50%

USAGE NEAR 50%

Hats, Sneakers, and Coats

CONVERSION POOL

Repeat buyers are the clearest conversion pool

3,476 customers have more than five previous purchases.

2,518

repeat buyers are not subscribed.

SUBSCRIBERS SPEND ABOUT THE SAME PER PURCHASE
AS NON-SUBSCRIBERS: \$59.49 VS \$59.87

Subscription status

AUDIENCE MIX

Revenue is broadly distributed across age groups

Use age as a targeting layer, not as the primary growth thesis

Three actions can turn behavior into growth

01 Convert loyal non-subscribers

Offer concrete benefits such as free shipping or early access

02 Replace broad discounts

Use targeted offers for high-value customers and discount-dependent products

03 Protect the revenue engine

Lean into Clothing and Accessories while testing female-segment growth

WHAT TO MEASURE NEXT

The next analytics layer is lifetime value

MODEL EXTENSION

Extend the model with customer lifetime value, churn, seasonality, location, and subscription propensity

QUALITY CONTROL

Recheck the dashboard age-revenue measure before publication: the report's SQL totals are the validated figures

DECISION NOW

Design a subscription offer for loyal customers, then measure conversion and basket lift
